

Maher Al [REDACTED]

MEP Engineer & Construction Manager

[REDACTED] | [LinkedIn](#)

Professional Summary

Results-driven MEP Assistant Manager and Mechanical Engineer with 5+ years of experience delivering high-value projects across Saudi Arabia, including luxury hospitality and flagship retail developments. Proven ability to manage the end-to-end MEP lifecycle: from design, coordination, and procurement to execution and commissioning, within complex, fast-track, and live environments. Recognized for successfully leading multidisciplinary teams, optimizing project costs, and ensuring compliance with international standards while maintaining zero disruption to operations in high-profile projects. Strong expertise in HVAC, plumbing, and fire protection systems, combined with solid commercial awareness and stakeholder management skills. Demonstrated leadership in delivering technically demanding projects such as VIA Riyadh and Kingdom Tower Mall, contributing to improved system efficiency, execution timelines, and cost control. Adept at bridging technical execution with commercial strategy to drive project success in competitive GCC markets.

Core Competencies

- **MEP Systems:** HVAC Design & Commissioning, Plumbing Systems, Fire Protection (NOVEC, Foam, Firefighting)
- **Project Management:** Construction Management, BOQ Development, Procurement & Supplier Negotiation, Cost Control
- **Leadership:** Team Management (Engineers & Subcontractors), Night-Shift Operations, Multi-Disciplinary Coordination
- **Technical Tools:** AutoCAD, SolidWorks, MATLAB, ANSYS, MS Office
- **Standards & Codes:** ASHRAE, NFPA, ASTM D975, International MEP Standards
- **Languages:** Arabic (Native), English (Fluent), German (Professional).

Experience

Havelock One Interiors

MEP Assistant Manager | Riyadh, KSA | Flagship Project: Kingdom Tower Mall | March 2024 - Present

- Lead MEP execution (HVAC, firefighting, fire alarm, plumbing) for a fully operational, high-end mall renovation, managing all works exclusively during night shifts to ensure zero disruption to daytime operations.
- Developed and restructured the full Bill of Quantities (BOQ) for MEP scope, aligning with real site conditions, design updates, and client requirements to improve cost accuracy and procurement efficiency.
- Oversee fit-out integration across multiple zones, ensuring seamless coordination between MEP and architectural works.
- Manage construction of a new decorative water feature in coordination with a specialist subcontractor.
- Lead and supervise subcontractors and site teams of 10–30+ operatives, maintaining strict safety, quality, and schedule compliance.
- Review shop drawings, material submittals, and method statements to ensure full compliance with project specifications and international standards.
- Represent project in all technical, commercial, client, and progress meetings, bridging design intent with on-site execution.
- Manage procurement and supplier negotiations, reducing delivery delays and optimizing cost effectively.

First Fix

Construction Engineer | Riyadh, KSA | Projects: VIA Riyadh & LO1 | August 2021 – February 2024

- Led full MEP execution for VIA Riyadh, a flagship luxury development featuring a 100-room 5-star hotel, 15 restaurants, 23 retail outlets, a cinema, and entertainment zones.
- Designed and delivered complete HVAC systems: chilled water, ventilation, exhaust, split/central AC, heating water systems, and refrigerant systems.
- Engineered end-to-end plumbing networks: domestic cold/hot water, drainage (waste, soil, storm), vent systems, and pump room infrastructure.
- Implemented fire protection systems including NOVEC, foam suppression, evacuation systems, firefighting pump rooms, and make-up air/exhaust fan arrangements.

- Designed and managed fuel systems for main tank supply and sub-tank refill alerting.
- Executed testing & commissioning: hydraulic balancing, air balancing, AHU/FCU functional testing, and chilled water equipment balancing.
- Managed a team of 3 engineers across 2 simultaneous projects, coordinating with PMC teams, consultants, and specialized subcontractors.
- Managed mechanical procurement: specification compliance, cost control, and on-time delivery of all MEP materials and equipment.

Enjaz United for Machinery & Equipment

Technical Engineer | Riyadh, KSA | January 2021 – July 2021

- Performed hydraulic calculations for pump selection aligned with project specifications and operational requirements.
- Prepared technical proposals and quotations, supporting the company's business development pipeline.
- Produced CAD models and drawings using GD&T (Geometric Dimensioning & Tolerancing) standards.

Middle East Airlines (MEA)

Mechanical Engineer Intern | Beirut, Lebanon | July 2019

- Conducted observations and analysis of the hydraulic systems within aircraft.
- Acquired knowledge of aircraft components, their visual identification, and their functional roles.
- Gained valuable insights by observing the maintenance and repair procedures for aircraft engines.

Rymco

Automotive Technician Intern | Beirut, Lebanon | July 2018 – September 2018

- Performed post-sale automotive services, including routine maintenance tasks such as oil changes, brake inspections, and filter replacements, primarily for GMC vehicles.
- Diagnosed and resolved complex technical issues for clients, including engine repair, to ensure the efficient and effective resolution of automotive problems.

Education

Lebanese International University

MSc, Mechanical Engineering | Beirut, Lebanon | 2020

- **Master's Thesis:** "Waste Tires to Energy (Pyrolysis). Published & approved by IEEE"
- **IEEE Publication Link:** Led 3 feasibility studies, delivering data-driven business cases.

Bachelor of Science in Mechanical Engineering | Beirut, Lebanon | 2018

Certifications

- **Project Management Professional (PMP) Training Program**, Success and Achieve Learning Center (2023)
- **Building High-Performing Teams**, Professional Development Certification (2024)
