

Professional Summary

I am a licensed Radiology Technologist with over 7 years of expertise in advanced diagnostic imaging and interventional radiology, specializing in CT scans, X-rays, fluoroscopy, and interventional techniques. My career is enriched by impactful research published in Diagnostics (MDPI) and a continuous drive to explore new frontiers in radiology. I have demonstrated leadership in managing imaging departments, ensuring radiation safety, and optimizing operational efficiency. With a strong passion for mentorship and education, I am currently delivering advanced courses on the physics of medical imaging, quality assurance, and radiation safety at the American University of Science and Technology. Holding a Master's in Biotechnology with a focus on medical imaging technologies, I am committed to continuous professional development, always striving to push the boundaries of diagnostic excellence and elevate patient care. I am now seeking new opportunities in both clinical radiology and academic teaching, where I can further contribute my skills, experience, and passion for education to advance the field and support the next generation of radiology professionals.

Core Competencies

- Proficient in advanced radiological procedures and interventional techniques.
- Skilled in radiation safety, quality assurance, and equipment calibration.
- Adept at patient education and ensuring comfort during procedures.
- Collaborative team player delivering accurate imaging results.
- Experienced in mentoring and managing imaging departments while proficient in teaching medical imaging and radiation safety.

Experience

Saint George Hospital University Medical Center | Beirut, Lebanon

Radiology Technologist | September 2017 – Present

- Performing diverse radiological procedures, including advanced CT scans (all exams with/without IV contrast, angio, colonography, enterography, cardiac, biopsies, drainage, perfusion) and X-rays (digital, panoramic, portable, fluoroscopy: upper GI, barium enema, cystography, ERCP), ensuring accuracy and adherence to protocols.
- Executing interventional radiology techniques such as chemoembolization, embolization, coiling, PTC and T-tube cholangiogram, arteriography and angiography, fistulography, stent graft, double-J stent, nephrostomy, and TIPS, in collaboration with multidisciplinary teams.
- Educating and preparing patients for procedures, addressing concerns with empathy, and ensuring safety and comfort during imaging.
- Maintaining compliance with radiation safety standards, shielding patients and staff from exposure risks, and safeguarding a secure work environment.
- Operating, calibrating, and managing advanced imaging equipment to guarantee optimal diagnostic image quality and procedural efficiency.
- Collaborating with radiologists and medical teams to interpret, analyze, and deliver accurate imaging results, contributing to integrated patient care.
- Supervising and mentoring junior technicians and students, fostering professional development and adherence to best practices.
- Overseeing departmental operations, including PACS and HIS management, data analysis, equipment maintenance, and ensuring operational readiness.
- Providing technical guidance to troubleshoot imaging challenges, ensuring high-quality diagnostic outcomes and patient satisfaction.

American University of Science and Technology (AUST) | Beirut, Lebanon

Bachelor's Degree Student Instructor | October 2023 – Present

- Teaching advanced courses in “**Medical Imaging Physics**”, covering X-ray, ultrasound, mammography, CT, MRI, and nuclear medicine.
- Conducting classes and demonstrations on “**Radiation Safety, Quality Assurance, and Control**” for radiologic modalities.
- Developing and adapting instructional materials to meet diverse student needs and enhance engagement.
- Planning and delivering lectures, discussions, and demonstrations tailored to students' academic and career goals.
- Preparing and administering assessments to evaluate student understanding and progress, providing constructive feedback.
- Maintaining accurate academic records, including attendance and grades, in compliance with institutional and legal policies.
- Fostering an inclusive, collaborative learning environment that promotes critical thinking and professional growth.

Education

American University of Science and Technology (AUST) | Beirut, Lebanon

- Master of Science in Biotechnology: *DNA Technologies with Emphasis in Medical Imaging*. GPA= 3.2 | 2020

American University of Science and Technology (AUST) | Beirut, Lebanon

- Bachelor of Science in Radiological Science. GPA= 3.5 | 2017

Certifications

Lebanese European Academy of Emergency Medicine | Beirut, Lebanon

- Cardio-Pulmonary Resuscitation | 2024

VCA Education Solutions for Health Professionals INC | Online

- Person-Centered Care in Medical Radiations Sciences Webinar | 2024

Saint George Hospital University Medical Center | Ashrafieh, Lebanon

- ANGIODROID THE CO2 INJECTOR: Equipment Training | 2019

Lebanese Red Cross | Ashrafieh, Lebanon

- First Aid CPR Course | 2016

Conferences and Workshops

Boston Scientific Educare | Beirut, Lebanon

- PI & Oncology Solutions Overview | 2022

La Sagesse University, International Radiology Day Symposium | Ashrafieh, Lebanon

- Cardiac Imaging Towards the Future | 2018

Lebanese Society of Radiology | Beirut, Lebanon

- Breast Cancer for Radiographers: From Screening to Breast Conservation | 2016

American University of Beirut Medical Center (AUBMC) | Beirut, Lebanon

- Cardiovascular CT and MRI Symposium | 2015

Publications

Publication Title: “Correlation of Kidney Size on Computed Tomography with GFR, Creatinine, and HbA1C for an Accurate Diagnosis of Patients with Diabetes and/or Chronic Kidney Disease”

Authors: Nashaat [REDACTED]

Published in: Diagnostics (MDPI), Volume 11, Issue 5, Article 789, April 2021

Impact Factor: 3.110 | Scopus Citescore: 1.1

Link to Publication: <https://doi.org/10.3390/diagnostics11050789>

Skills

- **Imaging Modalities:** CT, X-ray, and Interventional.
- **Software Proficiency:** PACS, RIS, and other radiology management systems.
- **Quality Assurance:** Radiation safety protocols, equipment calibration.
- **Teaching and Training:** Course development, student mentorship.
- **Patient Care:** Communication, preparation, radiation shielding.

Languages

- **Arabic:** Native Proficiency.
- **English:** Full Professional Proficiency
