

RAYAN A [REDACTED]

Radiology Technologist

[REDACTED] | [LinkedIn Profile](#)

Professional Summary

I am a licensed Radiologic Technologist with over 9 years of expertise in multi-modality imaging, including PET-CT, MRI, CT, X-ray, and interventional radiology. Adept at performing advanced diagnostic procedures, administering radiopharmaceuticals (FDG, DOTA, PSMA), and maintaining strict compliance with radiation safety standards. Recognized for delivering patient-centered care through effective preparation, continuous monitoring, and clear communication. Experienced in emergency response imaging, clinical trial protocols, and healthcare informatics systems (PACS, RIS, HIS). Committed to ongoing professional development and collaborative teamwork to ensure accurate and timely diagnostic outcomes.

Core Competencies

- Multi-Modality Imaging Expertise
- Radiopharmaceutical Safety & Handling.
- Patient Preparation & Education
- Emergency Response & Imaging
- Medical Equipment Operation & Maintenance.
- Healthcare Informatics.
- Radiation Safety Compliance.
- Continuous Professional Development

Experience

Mount Lebanon Hospital (UMC) | Hazmieh, Lebanon

Nuclear Medicine Technologist: PET-CT | October 2024 – Present

- Perform PET-CT scans, manage nuclear contrast agents, and ensure proper patient education about the procedure.
- Safely handle, administer, and dispose of radiopharmaceuticals (FDG, DOTA, PSMA) following strict radioprotection guidelines.
- Prepare patients for imaging procedures by explaining the process, ensuring comfort, and administering radiopharmaceuticals according to established protocols.
- Monitor patients during and after procedures, addressing any concerns or reactions, while following safety guidelines to minimize radiation exposure to both patients and staff.
- Collaborate with radiologists and medical teams to ensure timely and accurate diagnostic results.

MRI Technologist | April 2023 – Present

- Perform a variety of MRI exams and procedures, including specialized scans and contrast agent administration.
- Maintain MRI equipment through routine testing, calibration, and temperature control to ensure optimal performance.
- Implement strict safety protocols, especially when dealing with patients who have metal implants or other contraindications, ensuring the MRI environment is safe for both patients and staff.
- Collaborate with the medical team to review physician orders and determine the best imaging protocols.

CT and X-ray Technologist | February 2016 – April 2023

- Conducted specialized CT procedures, including biopsies, angiographies, and vascular studies.
- Participated in interventional radiology procedures such as nephrostomies and PIC-line insertions.
- Ensured that all diagnostic images adhered to ALARA principles to minimize radiation exposure.
- Collaborated with radiologists to ensure the accuracy and timeliness of imaging results.
- Delivered excellent patient care by explaining procedures, ensuring comfort, and maintaining a sterile environment.
- Responded promptly and efficiently to emergencies requiring immediate imaging, such as trauma cases, ensuring the patient's safety and well-being during the imaging process.

- Maintained accurate records of patient exams, including the type of imaging performed, any special instructions, and the images taken. Ensured proper documentation was completed and stored in the hospital's system (RIS, PACS, and HIS). (RIS, PACS and HIS).

Education

American University of Science and Technology (AUST) | Beirut, Lebanon

- Master of Science in Biotechnology: *DNA Technologies with Emphasis in Medical Imaging*. GPA= 3.5 | 2020

American University of Science and Technology (AUST) | Beirut, Lebanon

- Bachelor of Science in Radiological Science. GPA= 3.0 | 2017

Certifications

Bioethics for Healthcare Professionals by Dr. Gerhard Fortwengel | Beirut, Lebanon

- General Bioethics | 2020

Good Clinical Trial Practice from NIDA Clinical Trial Network | Online

- Good Clinical Trial Certificate | 2019

Lebanese Red Cross | Ashrafieh, Lebanon

- First Aid CPR Course | 2016

Conferences and Workshops

La Sagesse University, International Radiology Day Symposium | Ashrafieh, Lebanon

- Cardiac Imaging Towards the Future | 2018

Lebanese Society of Radiology | Beirut, Lebanon

- Breast Cancer for Radiographers: From Screening to Breast Conservation | 2016

American University of Beirut Medical Center (AUBMC) | Beirut, Lebanon

- Cardiovascular CT and MRI Symposium | 2015

Skills

- **Imaging Modalities:** PET-CT, MRI, CT, X-ray, Interventional Radiology
- **Radiopharmaceuticals:** FDG, DOTA, PSMA – safe handling, preparation, administration, and disposal
- **Imaging Software & Systems:** PACS, RIS, HIS
- **Procedural Expertise:** Biopsies, angiographies, vascular studies, nephrostomies, PIC-line insertions
- **Equipment Maintenance:** MRI calibration, contrast injector operation, CO₂ injector training (ANGIODROID)
- **Regulatory Compliance:** ALARA principles, radiation protection standards, clinical trial practices
- **Emergency Imaging:** Trauma protocols, urgent diagnostic imaging support

Languages

- **Arabic:** Native Proficiency.
- **English:** Full Professional Proficiency
- **French:** Semi Professional Proficiency.
