

B A S S E L A L [REDACTED]

• MOBILE : [REDACTED] • E-MAIL : [REDACTED]

Information

Marital Status: [REDACTED]

Nationality: [REDACTED]

Date and Place of Birth: [REDACTED]

Objective

- To gain a position in a growing and respectable organization, allowing me put my skills into others use, all while contributing to my career growth, personal and professional development.
- To grow my experience in the field of computer engineering

Educational Background

2013 - 2017 American University of Science and Technology Zahle, Lebanon Degree: Bachelor of Science.
Major: Computer Science.

2009 - 2012 Rachaya High School Rachaya, Lebanon General science

Technical Knowledge

- **Programing Languages:** Angular, C#, JavaScript, C++, Java, XML, XQuery, Spring boot, Objective-C (Basic level), SQL, Groovy, Html5, Bootstrap, CSS3, JSON, SOAP and REST API's
- **IDEs:** Android Studio, JDeveloper, Visual Studio Code, IntelliJ Idea, Visual Studio, XCode, SoapUI, Postman, IBM InfoSphereDataStage
- **Systems:** Oracle Service Bus (OSB) 12c, ETL, Apache Camel (Basic level), Backbase CXP 5.X
- **Databases:** SQL management studio - SQL server - Oracle 12c
- **Source control systems:** Git (GitLab, GitHub), SVN, JIRA

Skills

- Able to identify, analyze and solve problems
- Able to work as a part of a team and individually without supervision
- Able to negotiate and convince
- Able to learn and exchange information

Experience

November 2023 – Present: Senior Software Developer at Infostructure

- Expertise in Oracle ADF Architecture, JDeveloper, Oracle ADF Development with web services
- Created best practices for SOA development and developed BPEL processes
- Worked on C# and .NET framework to develop dynamic web applications.
- Develop and maintain web applications using C#, ASP.net MVC, HTML5/CSS3, JavaScript (jQuery)
- Supported SOA and OSB developers (Train and share knowledge) in day to day work
- JDBC Experience with design patterns Experience with SQL & stored-procedures, preferably Oracle PL/SQL
- Applied agile methodologies to deliver features ahead of schedule

October 2017 – November 2023: Senior Software Lead at SGBL Bank

- Supported SOA and OSB developers (Train and share knowledge) in day to day work
- Involved in implementation of best practices such as error handling, file archiving, ...
- Design and develop OSB services- Web Services, JAVA, SOAP, REST ,XQuery , WSDL, XSD
- Worked on C# and .NET framework to develop dynamic web applications.
- Applied agile methodologies to deliver features ahead of schedule.
- Work on creating user defined functions in JAVA to use them as external Jar files in BPEL
- Experience in Messaging Systems using JMS, MQ ...
- JDBC Experience with design patterns Experience with SQL & stored-procedures, preferably Oracle PL/SQL
- Develop and maintain web applications using C#, ASP.net MVC, HTML5/CSS3, JavaScript (jQuery)
- Providing the staging solutions for data validation and cleansing with PL/SQL and Datastage ETL jobs.
- Developing various jobs using database connectors, aggregator, and sequential file stages.
- Designing and developing DataStage jobs for loading staging data from different sources like files, Oracle, SQL server DB into data warehouse applying business rules which consist data loads, data cleansing, and data massaging.
- Creating a shared container to simplify the DataStage design, and used it as a common job component throughout the project.
- Developed and tested features in an Agile environment using Angular
- Participated in design meetings regarding application functionality and technical details such as data structures, security considerations, etc.
- Assisted in testing new features before release by performing manual tests or writing automated test scripts based on specifications provided by developers.
- Provided support for existing applications including troubleshooting issues reported by users and escalating unresolved issues to appropriate personnel when necessary.
- Analyzed business requirements to determine project scope and objectives with the goal of delivering high-quality solutions within deadlines.
- Publish Android and iOS version on test and production environment

- Collaborate with QA team to define test cases, metrics, and resolve questions about test results
- Development using Agile Methodology, that included iterative application development, weekly Sprints, stand up meetings, Followed Rally for tracking processes and streamlining Agile planning
- Experience in working with version control and software configuration management & deployment tools including Subversion, Git
- Develop SOAPUI scripts to perform the load testing
- Test OSB and SOA services using SOAPUI and Postman
-

Languages

- Fluent in English (written and spoken)
- Fluent in Arabic (written and spoken)
- Intermediate in French (written and spoken)
